Education

Northwestern University

Expected Spring 2027

B.S. Computer Science, Machine Learning & Data Science Minor, 3.92 / 4.00 GPA

Evanston, IL

Coursework: Distributed Systems, Scalable Software Architectures, Design and Analysis of Algorithms, Computer Systems Software, Intro to AI, Data Engineering, Networking, Design Thinking & Communications

Content Creation: [Coding Youtube Channel](#) - **2,000+ subscribers** and **125,000+ views**

Skills

Languages: Go, Python, TypeScript/JavaScript, SQL, C++, C, Java

Technologies: Git, UNIX, React, Docker, NextJS, Django, AWS, Flask, Redis, Node.js, ExpressJS, MongoDB

Experience

360 Privacy

Sept. 2025 – Dec. 2025

Software Engineer Intern

Remote

- Incoming Software Engineer on the Vulnerability Explorer team

CodeHS

June 2025 – August 2025

Software Engineer Intern

Chicago, IL

- Built out core utilities for early-stage development of [Bool](#), helping **1k+ users** create websites from a prompt
- Collaborated with a team to engineer a reliable, high-performance async job processor using Django and Redis
- Fixed a submission bug in network stream that led to a **50% reduction in cloud resources**
- Engineered core systems including a promo code engine, asset management, and a feature flagging service

Projects

Raft | Go

Mar. 2025 – June 2025

- Built a reliable fault-tolerant key-value store by implementing concurrent distributed consensus in Go
- Engineered persistent state storage, achieving rapid server recovery and seamless failover across nodes

NUFood | Go, TypeScript, React, PostgreSQL

Sept. 2024 - Present

- Deployed a fast, optimized web app for Northwestern students to find favorite dining hall meals
- Engineered a scalable backend API in Go, **reducing latency by 90%** compared to available alternatives
- Built a batched data pipeline to fetch and cache all pages upfront, enabling instant UI and filtering
- Featured in *The Daily Northwestern* and scaled to **200+ daily** Northwestern students

Extracurriculars

Northwestern University Department of Computer Science

March 2025 – June 2025

Undergraduate TA - CS 110: Intro to Computer Programming

Evanston, IL

- Led weekly office hours and discussion sections teaching fundamentals of Python to **20+ students**

Northwestern University Robotics Club

Sept. 2023 – June 2024

Computer Vision Team Lead

Evanston, IL

- Engineered a binocular vision system for a lacrosse goalie, using a Convolutional Neural Network in OpenCV for real-time ball detection and trajectory prediction.
- Optimized trajectory prediction algorithms **reducing ball interception time by 30%**
